

*I need software that works with my QuickBooks*

**Call and ask the service software representative this question ...**

***Am I able to bill my customers directly in QuickBooks or do I need to start my billings in your software?***

# Option #1 - Simple and Seamless

With the Fireline Service Software you create all of your customer billings and cash receipts in QuickBooks. Plugs-in directly into QuickBooks.

This software does not have a built-in accounting program. No import, Sync or Linking needed.

A simple and seamless solution.

# Option # Two – “All-in-One” Software

Duplicate Customers with Two Separate Accounting Programs

All-in-One

Includes a Billing and Accounting Software and a Service Program

Billing and Accounting Software

With All-in-One software you do not create your customer billings or cash receipts in QuickBooks. They are created in the All-in-One software. First you copy your QuickBooks customers into the other software. Now you have the same customer in two accounting programs and you need to be sure the balances are always the same. Remember to Sync/Link into your QuickBooks daily and fix any Sync errors.
